

PhD Student Positions Available

Our lab has a variety of exciting ongoing projects investigating cardiac metabolism and diabetes. Students will be responsible for the design and execution of research projects and will be expected to use animal modeling, cell culture (endothelial cells and cardiomyocyte isolation), and other molecular biology/biochemistry techniques. Applicants will be expected to apply for grants, write abstracts/manuscripts from the obtained results, and work well within a collaborative environment.

Applicants should have a M.Sc. in pharmacology, biochemistry, or a related field with relevant experience.

Please send a detailed CV, and a cover letter describing your research experience, research interests and future research goals to:
